3D FOR EASY, EFFORTLESS FIT

SISU Mouthguards are known for their unmatched protection, comfort, cleanliness, and remoldability. SISU 3D improves on previous SISU models, and adds several new features:

- Pre-formed guard for an effortless, fast, fit and go shape.
- Variable material thickness to put protection where it is needed, and comfort where it is desired.

Made in the USA

YOUTH
Up to 5' (150 cm)
For smaller mouths and children

Available in 14 colors:

ADULT
Over 6' (180 cm)
For adults

Available in 14 colors:

AERO FOR TEAM SPORTS

The ultralight design of the Aero Mouthguard is 50% thinner than conventional sports mouth guards, providing maximum comfort and convenience. Combined with its quick, custom and remoldable fit, you'll entirely forget it's there.

Made in the USA

SMALL
Up to 5' (150 cm)
For smaller mouths and children

Available in 14 colors:

MEDIUM
5' - 6' (150 cm - 180 cm)
For average mouths

Available in 14 colors:

LARGE
Over 6' (180 cm)
For larger mouths

Available in 5 colors:

MAX FOR HIGH-IMPACT SPORTS

At 2.4mm thin, the SISU Max Mouthguard offers the most protection of any SISU guard, but is still 30% thinner than conventional sports mouth guards. It's custom-fitted so you'll be able to talk, breathe and drink better than ever before. It's really the best of both worlds.

Available in 14 colors:

ONE SIZE Over 5' (150 cm)
For average and larger mouths

Made in the USA

TETHER FOR CONNECTED PROTECTION

With the SISU Tether guard, you can connect your guard directly to your helmet. Featuring the same design as our 3D guard, we have now implemented a breakaway strap.

- Pre-formed guard for an effortless, fast, fit and go shape.
- Variable material thickness to put protection where it is needed, and comfort where it is desired.
- Breakaway tether strap that can be looped around the front of your helmet.

Available in 5 colors:

YOUTH
Under 5'
(150- cm)

ADULT
Over 5'
(150+ cm)

Made in the USA

GO

FOR ESSENTIAL PROTECTION

Available in 3 colors:

Smaller in size and price, the all new SISU GO Mouthguard was made to be both discreet and comfortable while still providing the necessary canine to canine coverage to protect where most dental injuries happen. The SISU protection athletes expect, at a more affordable price point.

FLAT2FIT™ TECHNOLOGY

The SISU Aero, Max and GO Mouthguards use Flat2Fit technology to create a completely custom fit to your teeth. The material comes flat in the packaging, and within minutes, transforms into a perfectly fit mouth guard ready to protect you from whatever comes your way.

PREFORMED TO FIT TECHNOLOGY

The SISU 3D and Tether Mouthguards utilize advanced preformed technology to ensure a seamless fitting process. The material is pre-shaped within the packaging and, in just a few minutes, molds into a perfectly fitting mouthguard.

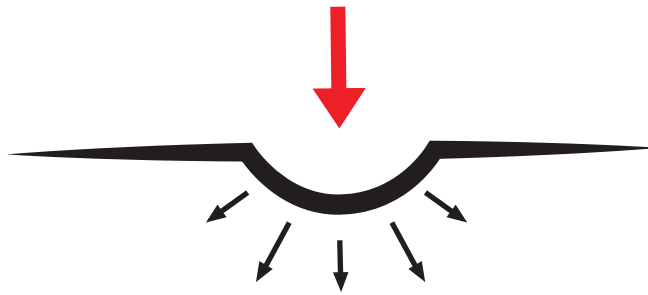

POWERED BY DIFFUSIX™ TECHNOLOGY

THE SISU ADVANTAGE:

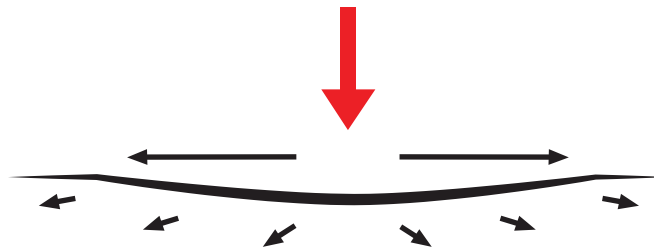

SISU Mouthguards are made from a non-compressible, perforated material that distributes impact force over the entire surface of each mouthguard. With their custom, remoldable fit and unmatched strength, SISU Mouthguards are able to better protect your teeth while providing you the freedom to easily talk, breathe and drink.

Conventional Mouthguard
Impact Force Dispersion

Conventional mouthguards are made from a material that is too soft to fully protect your teeth from harm.

SISU
SISU Mouthguards
Impact Force Dispersion

With our one-of-a-kind Diffusix™ Technology, SISU Mouthguards are made from a material that absorbs and diffuses impact throughout the entire mouthguard, meaning that much less impact force is transferred to your teeth.

WHY THE PERFORATIONS?

The **SISU Triangle™ pattern** and perforations serve three important functions:

Custom Fit

Vacuum-like suction allows you to create that custom fit so unique to your teeth, the guard stays snugly on your teeth during the entire game or practice.

Talk. Breathe. Drink.™

Natural flow of air and saliva empowers you to talk naturally, breathe normally and stay hydrated during the game or practice.

Better Protection

Like the support systems on a suspension bridge, the perforations oscillate on impact and redirect the forces to scientifically engineered reinforced parts of the guard.

GOT BRACES?

If you have braces or are undergoing other orthodontic treatment, **DO NOT** attempt to fit your SISU Mouthguard at home. Instead have your dentist or orthodontist fit your SISU Mouthguard for you! He/she will use the appropriate barriers between the guard and braces so that the material, while pliable, doesn't bond to your brackets. We also recommend that no matter your child's age, all athletes use an Aero Medium or Aero Large SISU Mouthguard whenever wearing braces in order to ensure a proper fit.

Visit sisuguard.com/fitting-with-braces for more information.

FITTING GUIDE

Every SISU guard is remoldable up to 20 times. Simply place your SISU in hot water, let it soften and mold. Full, detailed instructions should be followed as seen on our website.

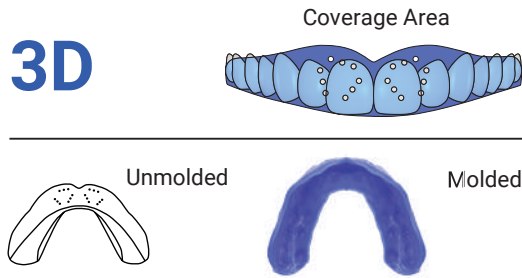

Optimal Protection for Every Purpose: Choose SISU for Sports, SOVA for Nighttime Grinding Guards — Don't Settle, Sell Smart

Help your customers discover the perfect solution for nighttime teeth grinding with SOVA Night Guards, specifically designed for sleep comfort. If you're seeking a reliable option beyond SISU Mouthguard for nighttime grinding, explore the specialized features and comfort of SOVA Night Guards to ensure a restful and protective night's sleep.
